DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-13 are rejected under 35 U.S.C. 102(e) as being anticipated by US20030040173A1 to Fonash et al. Fonash et al teach a method for manufacturing a device which comprises forming a lower electrode (14) on a substrate; forming a sacrificial layer pattern on the substrate including the lower electrode (16); forming an upper electrode (16); forming an upper electrode on the substrate including the sacrificial layer pattern (18); removing the sacrificial layer so that a nano gap (20) is formed between the lower electrode and the upper electrode; and adsorbing conductive organic molecules (21) between the upper electrode and the lower electrode in the nano gap. (See Figure 1; sections 0012, 0015, 0035 and 0048).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
